M. D. of Collholme Meeting

A meeting of the Council of the Collholme Municipal District No. 243 was held in the Collholme School on Saturday, August 3rd, 1935 at 2 o'clock p. m.

Reeve and all councillors were present.

Warren—that the minutes as read by the Secretary be adopted.

Young—that we allow taxes to be worked out on the N₁₂-19-27-7-N 4thm, to the sum of \$4.50 Municipal tax only.

Warren—that Councillor Spreeman be a committee of one to see J. Jackson re water right and place culvert if necessary.

Young—that we give By-law re Fax Consolidation for the year 1935 its third reading

Stewart & Warren—By-law read for the third time.

That we pass the By-law No. 38. Was declared passed on this day the 3rd of August 1935. The Reeve and Secretary signed the By-law.

Stewart—that we accept the application of J. D. Skodice and the Holland Canada for tax consolidation 1935.

Warren—that we intrust the Secretary to write to P. Sleanes, of Cereal, P. Gagnon, of Cereal and J. Jackson to keep their cattle on their own leases or the council will have to take action.

Warren—that the following committees be appointed to investigate the relief situation, Reeve Paetz and Councillor Spreeman.

Warren—that the Council request the Provincial Government to institute some system of Public Works to provide employment for people in this municipal district who would otherwise be on relief.

Stewart—that we grant to the Chinook School Fair the sum of \$10.00.

Spreeman—that we issue receipts for work done in the Grass Hopper station as per time sheets.

H. B. Allen visited the Council meeting to express his appreciation of the Council's consideration for him, in sending him to the hospital for treatment.

Mr and Mrs. I. W. Deman, of Morrin, were pleasant callers at the Advance office on Friday renewing their subscription.

Jas. and Donald Guss, of Drumheller, were visitors at the Milligan home Sunday.

Born—To Mr. and Mrs. Lloyd Robinson Friday, August 9th, at the Cereal hospital a son.

Miss Audrey Neff, of Hanna who has been spending a two week's vacation in the Chinook district, the guest of Mrs. O. D. Harrington and Mrs. J. C. Turple.

Now is the time to get your Binder and Mower repairs.

We have a good stock of both

I. H. C. and John Deere repairs on hand

also

Holland Binder Twine

Put your orders in early.

MC CONKEY BUYS LEAVELL MINES AT SHEERNESS

American Interests Announce Sale at Substantial Profit

(The Hanna Herald)

H. C. McConkey, prominent Drumheller coal operator, and for several months heavily interested in the Sheerness field, has acquired full control of the Sheerness mine, which has been operated by Leavell Coal Co., Ltd. The announcement was made on Wednesday by Evan Bennett, manager of the Leavell properties since they were purchased from J. Warneboldt two years ago. In the purchase, Mr. McConkey acquired the interests of Col. Leavell and Mr. Bennett, who state the sale was made at a substantial profit on the investment. Mr. McConkey is now the sole owner of the Sheebo mine, the Herald is informed, subject to certain indebtedness to Mr. Warneboldt and to the Leavell Coal Co. of Oklahoma.

Col. Leavell, who has been a visitor at Sheerness recently, left a few days ago for a fishing trip to Banff and will return to the United States very shortly. Mr. Bennett leaves in a few days for Illinois to make a survey of certain mining interests which he holds in that State, but expects to return to Alberta later.

Mr. McConkey's recent purchase places him in full control of one of the most promising strip mining projects in Alberta, in addition to which he has other large interests, farming and mining, in the Sheerness area, as well as vast ranching projects east of Wardlaw.

The introduction of the large food species from the British West Indies to Puerto Rico has virtually saved this year's sugar crop of the latter country. White grubs of May beetles last year swarmed everywhere devouring the roots of the cane and other plants, and practically wiped out the crop. The loads this year reduced the grubs to scarcity.

For the month ended June, 1935, Canada exported \$33,614,238 worth of agricultural products to the United States.

The amount of branded beef sold in Canada during the month of June, 35 was 3,312,601 pounds.

There were 84 food chain companies operating 2,381 stores in Canada in 1934, with sales amounting to \$164,614,500. In 1933 there were more chain stores but less sales, 91 companies operating 2,398 stores with sales \$1,231,600 less than in 1934.

NATURAL GAS SUPPLY WILL BE SOUGHT BY GOVT. GEOLOGIST --WANTED IN IRRIGATION PLAN

Area Between Steville and East Coulee Promises Gas Supply—May Irrigate Bottom Lands by Pumping

(The Hanna Herald)

Mrs. F. Otto, who has been visiting at the home of her daughter, Mrs. P. R. Dobson of Calgary, returned Tuesday.

Dale Smith, of Hanna, who has been visiting with Eldon Rideout returned to his home last week.

Miss Mildred Milligan who spent a short holiday at Calgary and Drumheller returned Sunday.

A barn was struck by lightning Saturday evening which burned to the ground. It was situated on the old W. H. Jewett farm, west of Cloverleaf School.

The Chinook district has had several heavy rains lately. This means there will be lots of feed for stock also vegetable are best in years.

Robert Harrington, son of O. D. Harrington, wrote on 4 units of Grade XI. Exam and passed successfully on all

There was a large attendance at the Public meeting held at Cloverleaf School Monday evening. Speakers were Robert Gardiner, President of the U. F. A. and Lorne Proudfoot M. L. A.

NO NOMINATION FOR ABERHARTISTS

Although announcement was made last week that a nominating convention would be held here on Wednesday for the purpose of selecting a social credit candidate to contest the Federal riding of Acadia, no nomination was made yesterday. Delegates were held from all over the riding and in considerable numbers, but it is understood that, upon counsel of Wm. Aberhart, nominations were deferred. Yesterday's meeting, the Herald is told, was devoted to organization work.

A Dominion Government geologist is now on his way west to survey the possibilities of securing natural gas somewhere between East Coulee and Steville with a view to developing power to be used for irrigation of the bottom lands along the river. This was learned on Wednesday by the Herald through O. S. Longman, Field Crops Commissioner, who was in conversation over the long-distance telephone with W. L. Jacobson, secretary-treasurer of the Water Development Committee operating under the Prairie Farm Rehabilitation Act. The Herald learns that this particular activity in regard to natural gas is looked upon as promising, and investigation will be thorough and complete. The prediction has frequently been made, recently, that a supply of natural gas can be secured along the river between Steville and a point near East Coulee. Irrigation projects using natural gas for pumping have been proven feasible in other points of the province, a notable example being at Medicine Hat where the Heat Irrigation project has been very successful for years.

The Herald asked Mr. Longman if this district could expect some attention in the near future with a view to actual work being done on storage dams throughout the area. In the telephone conversation with Mr. Jacobson, Mr. Longman was informed that three engineers were already in this section of the province and would be concentrating on the Hanna and Eastern area with a view to reporting on private dams and community enterprises. The Herald learns that for the present, the water development committee is devoting its attention largely to what are termed private enterprises. These enterprises are not necessarily restricted to individual local dam sites but may include larger conservation scheme in which several individual farmers might be interested, or which might affect a whole community. For the present at least, it is not expected that any progress will be made this year toward water diversion from natural streams, but this feature of the rehabilitation program is expected to come up for consideration next year.

Committee Has Data

When the Herald expressed disappointment that no apparent progress had been made toward water conservation in this area by the committee this year, Mr. Longman pointed out that dam localities and all data concerning such sites, which was prepared some years ago under direction of the Water Resources Branch, had been placed in the hands of the Water Development Committee. As previously mentioned, three engineers are reported to be going over the field and, so soon as their reports have been made, actual work can be commenced. It is expected that A. B. Cook, one of the engineers in this field, will visit Hanna on Friday.

Enjoy the Best Tea

"SALADA" TEA

Nature Upsets Man's Plans

Harvest time in Western Canada has again arrived and for the next few weeks great activity, from early morning till late at night, will be the rule right across these western plains. Following several years of short crops, and in many sections complete failure of crops due to drought, and consequently lack of resources on the part of tens of thousands of farmers to seed and harvest a crop this year, governments and municipalities, banks, mortgage, loan and implement companies made provision whereby farmers were supplied with feed, fodder, seed, gas and oil, machinery repairs, binder twines, and other essentials to the seeding and harvesting of a crop. Individual farmers may not have received all that he desired, but, speaking broadly, the needs of the situation were fairly well met.

Taking the country as a whole, and excepting certain more or less restricted areas, copious rains have fallen throughout the growing season, following a somewhat late seeding. Up to a few weeks ago prospects for at least a normal, if not above normal crop, were bright. Grasshoppers and cut worms which were at first threatened, seemed to have been brought under control, weather conditions prevailing being a main factor to aid and. Prospects for a fairly large and satisfactory crop were excellent, and estimates of as high as 350,000,000 to 400,000,000 bushels of wheat were commonly made.

But last month the bright picture became clouded as rust made its appearance in the wheat fields, coming in from the southeast and spreading rapidly westward and northward. Governments, financial concerns, economic planners, farmers, every human agency is powerless against this development of Nature. For years technical agricultural experts, chemists and scientists employed by Governments have been seeking a means to offset the ravages of rust and to develop a strain of wheat that will be rust-resistant. But Nature this year has defied all their efforts, and it is now self-evident that Western farmers will sustain heavy losses through the effect of rusted crops.

Estimates of the loss through rust already run as high as 100,000,000 bushels of wheat; some estimates are even higher, and, of course, the actual loss will not be known until the harvest is completed. On many farms, even in some municipalities, no wheat will be harvested.

There is no desire to be alarmist in reviewing this situation. Notwithstanding the inroads by rust upon what a few weeks ago was one of the most promising crops in many years, the general agricultural situation is decidedly better than for some years past. Grass again covers great areas of the West which recently presented a desert-like appearance. Feed and fodder formerly lacking is now available. Garden crops are generally reported to be good. But the big cash crop of the West, wheat, will be smaller and of decidedly less value than was hoped for and expected a few weeks ago.

The whole country must face this unfortunate fact and meet it to the best of its ability. No human agency can be held responsible for the losses sustained. It was beyond Governments, corporations, and individuals alike to prevent. All will be included in the losses sustained—Governments through loss of revenues and the necessity of providing assistance where it was not anticipated it would be necessary; railways through loss of traffic and therefore loss of revenues; railway, elevator, machine company and other employees, including farm laborers, through less employment; financial concerns to whom money for advances made is owing but which can not be paid as fully as was anticipated; farmers more especially because the returns for their year's labor are swept away or very largely reduced. In a word, no existing, political, financial, economic, or social system is responsible for the heavy losses the country is sustaining. Nature and conditions developed under its inscrutable laws are the sole cause.

But Nature is not always unkind. In the long run it always strikes a fair balance. Its laws operate not for one year, but throughout cycles of years. Man must not only recognize this truth, but govern himself accordingly. There is no good end to be served by becoming despondent and discouraged. There is only one courageous thing to do, and that is to face the situation and the problems presented. Losses to-day will be compensated for by gains to-morrow. That is a law of Nature. Therefore, the future should be faced with courage and determination. Life is a battle and must be fought. Man could not exist on "flowery beds of ease." If he is to succeed and reach the topmost rungs of the ladder of life, he must exert himself and climb, battling against all obstructions in his way, eradicating the weeds that cling and clog his steps, removing weaknesses and strengthening the ladder. Climbing he will become stronger; crouching at the foot of the ladder, waiting for somebody to carry him up, he will become flabby and weak and eventually succumb. Courage and determination, which will bring confidence, is essential to success in any walk of life. And in the long run Nature will not bar the way, rather it will be found helpful and co-operating.

Wood Ready For Use

Germany Has Treatment To Season Trees While Growing

Telegraph poles, railway ties and other heavy wood necessities may be grown to order by a treatment which has just been discovered in Germany. Trees are made to season themselves so that when felled their wood is ready for immediate use. A kind hole is made in the tree trunk, and a special chemical solution containing arsenic and other salts is injected into the living tree. These chemicals enter the sap stream of the tree, and are gradually carried to the ends of the highest branches. The tree does not survive the treatment very long, but as it dies it becomes thoroughly saturated with preservative and can be used on railroads or for telegraphs and telephones without any of the usual treatment.

Serves Double Purpose

Balloons Which Turn Into Parachute Tested Near Moscow

A "parachute balloon," designed to change its form in the air and to descend as a parachute, has made its first experimental flight from the field of the government dirigible factory near Moscow. The pilots, Modestoff and Lioeff, were ordered to ascend 10,000 feet, then to open the valve, permitting the gas to escape. The underpart of the bag is designed to fold forward in such a manner the bag gradually takes the form of a parachute.

Keep cast-iron work in good condition by rubbing with blacklead.

Beer was made by the Egyptians 5,000 years ago.

Trying For New Record

Speed Of 300 M.P.H. Is Sir Malcolm Campbell's Aim

A circus of record breaking under the boiling sun on Utah's salt desert, planned as the greatest show in the history of automobile speed racing, is the September aim of Sir Malcolm Campbell and Captain George Eyston, Britain's swiftest drivers. The speed kings announced their plans—to sail together, Sir Malcolm to shoot again at his dream of 300 miles an hour in the veteran Bluebird; Eyston to tackle every mark between that one and 24 hours. Filled with glowing accounts of the Bonneville salt flats surface by his friend, John Cobb, who recently set 21 new records there, Campbell is confident that old Lady Bluebird, the six-ton thunder wagon that roared to the present land speed record of 276.516 on the sands of Daytona Beach last winter, finally will carry him this time over a mile in 12 seconds flat—300 miles an hour.

"I'm sure I'll beat 300 this time," Campbell said. "Then I'll chuck racing and stick to business."

The 50-year-old Englishman who has no challenger to-day for speed over a measured mile has made a few alterations in the Bluebird since his return from Florida.

Captain Eyston, who in the past nine years has set 200 records, more than any other living man, will alternate record tries with Campbell. Eyston will drive a fearsome looking front-drive juggernaut, powered with a 400-horsepower Rolls Royce aviation engine. Its tanks carry 45 gallons of gasoline, giving it a 500-mile range without refueling. Eyston believes he can average 150 miles an hour or higher for 24 hours and is bringing Albert Denly along to drive relief.

Fingerprints By Radio

Experiments Have Shown Great Improvement In Results Obtained

Transmission of fingerprints by radio is the latest link between science and criminal detection—a link that is being more strongly forged by Scotland Yard every day. Experiments were begun several months ago. Although not yet regarded as an every day practical business, considerable improvement has recently been made in the results obtained.

At first the images were blurred, even when sent from enlarged prints, but greater technical experience is gradually overcoming this drawback. The time is very near when in urgent cases, portable apparatus will be used to transmit fingerprints direct from the scene of the crime to Scotland Yard records, it was predicted.

As the technique of wired and radio transmission improves, it will be possible to send life-size fingerprint photographs speedily over any distance, police believe. Scotland Yard rapidly turns new scientific inventions to its own use in the fight against criminals. The present head of the famed investigating department, Lord Trenchard, has had much to do with the reorganization plans.

Demand For Homespun

Women In Quebec Are Kept Busy

Filling Orders Spinning wheels and hand looms in the district around Murray Bay, Quebec, are kept busy as the housewives try to fill demands of the fashionable world for homespun fabrics.

For years Murray Bay has been famous as the home of homespun. Its fine, soft blankets and candlewick spreads have been carried away by tourists to far parts of Canada, the United States and Europe. This year there are still the blankets, spreads and hooked rugs, but the rage is for homespun fabrics, from which suits and skirts, sport jackets and coats are being made.

Much of the charm of the new fabrics is in their natural coloring and weave. Colors are from natural vegetable dyes, the habitation making the fabrics from beginning to end.

Though women are doing most of the buying of habitation homespun, men are also using them for sports wear.

Making Progress

"Son," wrote a busy father, "emulate Benjamin Franklin, who said, 'To learn the value of money, borrow it.'"

In due time the boy at college replied: "Dear Dad, I did as you suggested. Borrowed \$50 from my roommate. What do I do next?"

More than two dozen species of orchids grow wild in the regions around Chicago.

Power Of Sun Rays

Amount Of Sunburn In Sunlight Measured By Machine

Government scientists of the United States have successfully tested a machine which measures the amount of sunburn in sunlight.

Dr. W. W. Cobbett, internationally famous radiation expert of the National Bureau of Standards, has perfected the machine which measures the ultraviolet rays of sunlight which cause sunburn and tanning. The machine is known technically as a portable precision ultraviolet ray meter.

Ultraviolet rays comprise less than a thousandth of the total radiation coming from the sun, Dr. Cobbett said. Yet these particular rays are strong enough to scorch the skin with only several hours exposure during the summer months. The rays also are used in treating rickets.

Tests have been made at Washington and San Juan, Puerto Rico, both are approximately at sea level and relatively free from smoke and dust. Dr. Cobbett pointed out that altitude and flying particles were factors in measuring solar radiation.

The "tanning" rays were somewhat stronger at San Juan than at Washington at the same comparative altitudes. This conforms with other radiation studies made in the tropics which show that the sun, being directly overhead, has to send its light through less ozone in the stratosphere. Experts estimate that the sunlight reaching Washington has to travel through approximately five per cent more atmosphere than at San Juan, thus absorbing more ultraviolet rays.

Other tests performed at Flagstaff, Ariz., showed less ozone in the afternoon than in the morning and thereafter a greater atmospheric transparency. Autumn was found to be more transparent than the spring, experts found.

Fog takes its share of the ultraviolet rays out of the sunlight and there is less possibility of tanning when humidity is high, it was found.

Physicians are interested in the device because of the curative power of ultraviolet rays in cases of rickets, which is practically unknown in the tropics.

The present machine screens out the ultraviolet or "tanning" rays in the sunlight and measures them quantitatively with the aid of a photo-electric cell.

Sees Market In Britain

Opportunity For Export Of Tuberculin-Free Cattle From Canada

Prevalence of bovine tuberculosis in Great Britain provides a great opportunity for Canadian cattle breeders to develop a large market for tuberculin-free cattle. Dr. Arthur Stephens, member of the British Medical Association touring party, said at Toronto before training for Winnipeg. Dr. Stephens is an alderman of Swansea, South Wales.

"Sixty per cent. of cattle in Great Britain show tuberculosis in tests," Dr. Stephens stated. "Canada's development in recent years has shown this can be reduced. For this reason and because opinion in Great Britain is strongly in favor of tuberculin-free herds, I believe a wonderful opportunity exists to benefit both Canadian cattle-breeders and the British people."

A Modern Samson

Native Of India Earns Nickname With His Feats

N. K. Modi of Dumka, Bihar, India, has earned for himself—with good reason—the nickname of "Samson." Here are some of the feats he has recently accomplished:

Killed a tiger single-handed, armed only with a stick;

Killed a buffalo by twisting its horns till its neck broke;

Put to flight, by himself, a gang of 40 bandits. Saved the life of his servant, who fell down a well. His own left ankle with one hand as he disappeared over the edge, and he hauled him back with ease into safety.

Surplus Dairy Nations

New Zealand, Australia, Denmark, Netherlands, Canada, Italy, and Switzerland appear to be the world surplus dairy nations. The United Kingdom is the world market, supplemented by Germany in the case of butter, by the United States, Germany, and Belgium in cheese, and by a number of nations in condensed and evaporated milk.

The human eye responds to wave lengths of light from those 167 ten-thousandths of an inch long, which give a sensation of violet, to those 386 ten-thousandths of an inch long, which give a sensation of red.

WEAR**

By Ellen Worth

Here's a simple to sew swagger coat that finds an important place in every smart wardrobe.

To-day's pattern also provides for seven-eighths length as seen in the small back view.

Lightweight wool in vivid colorings as emerald green, red, purple, etc., is very smart over dark sheer frocks.

White, navy, or pastel lines are enchantingly lovely for town or resort wear.

It's made at a very moderate cost. Style No. 312 is designed for sizes 14, 16, 18 and 20 years. Size 16 requires 2½ yards of 54-inch material with 2½ yards of 39-inch lining.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy today, the price is 15 cents.

Will Await Conference

Britain Has Not Yet Decided On Naval Program

Sir Bolton Eyres-Monsell, first lord of the admiralty, told the House of Commons Britain's naval building program could not be determined "until the results of a naval conference and programs of other powers are known."

Referring specifically to a published report that Britain plans to build a new \$750,000,000 battle fleet by 1942, he said: "No attention need be paid to unofficial and irresponsible statements."

Britain, he added, has advanced a hypothetical program to the United States, Germany, France and others.

Honey As A Healer

Dr. N. Zais, a leading physician in Vienna, Austria, says honey is the best healer of wounds and superior to all ointments. He has treated several thousand cases with honey, and has not had a single failure. It soothes pain, hastens healing and acts as an antiseptic, he declares. It is also highly effective with burns and carbuncles.

Rattlesnakes add from two to three "rattles" annually, and sometimes four.

Four hundred years are required by nature to build one inch of top soil, according to recent estimates.

The King's Reach

Section Of Thames Named In Honor Of Jubilee

The river Thames, so far as it runs through the metropolitan district of London, is divided into a series of sections called "reaches." There is Chelsea Reach, Blackwall Reach, Greenwich Reach, Gallions Reach and so on, but one section appeared to have escaped being named, a deficiency which has just been rectified in honor of the King's silver jubilee. This is the stretch between the Pool of London, so familiar in pictures, just west of the Tower Bridge, and Lambeth Reach, which terminates on the Houses of Parliament side of Westminster Bridge. The Port of London Authority has decided to call it "The King's Reach."

Once upon a time the Thames was more used as the King's Highway than the road itself between Westminster and the Tower of London, the royal residence, St. James Palace being at one end while His Majesty often had business at the Tower—sometimes very dirty business at that. So that "The King's Reach" is an appropriate name for this important waterway. It includes London Bridge, Southwark Bridge, Blackfriars Bridge, Waterloo Bridge to Westminster, and on the shore line are such noted places as Billingsgate Fish Market, Cannon street railway station, St. Paul's Cathedral, Victoria Embankment, including Cleopatra's Needle, Somerset House, where wills are filed and all the births, deaths and marriages in England are registered, Charing Cross and Scotland Yard.

So if you should happen to be in Old London and lean over the parapet somewhere between the Houses of Parliament and the Tower looking at what John Burns calls "liquid history," that part is "The King's Reach."—St. Thomas Times-Journal.

Gave Address On Slang

Professor Of English Says It Is Language On Trial

At the spring meeting of Yorkshire Dialect Society held at Wilberforce House, J. H. Gratton, Professor of English language and philology in Liverpool University gave an address on slang, cant, and jargon. He said it was impossible to acquire a thorough knowledge of English without being familiar with slang and vulgarisms. Slang was language on trial, but no word or expression had any real meaning outside its context and the situation in which it occurred. Cant was originally the secret language of the under-world, and he defined jargon as language unintelligible out of its proper sphere. Consideration would show the absurdity of condemning slang unheard. Attempts had been made to classify it according to occupations. What we really wanted was more knowledge about the passing of sectional slang into general slang. Words which were started as slang had risen in value and become an essential part of our colloquial of literary vocabulary.

New Tower Telescope

A new solar tower telescope, the first of its kind in England and the only large astronomical telescope in the world with optical parts made entirely of fused quartz, has been commissioned at the observatory in Oxford, England.

The liver in a human body is about seven times as large as necessary for the work the organ does.

MISS ALADDIN

—By—
Christine Whiting Farmer
Author of
"One Wide River to Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home from what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Columbine Nelson, who in turn introduces Mark and Matthew Adams, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general look of poverty. Nancy and Jack are shown to the rooms they are to occupy, and both the young people consider the furniture and decorations hateful and, contrasting the present quarters with their luxurious home in Boston, wonder if they can endure the change for any length of time. Aunt Columbine tells why she wrote the letter to them, and relates some of her early experiences at Pine Ridge of hostile Indians and forest fires, of her father's hunt for gold, and of her mother's splendid spirit, but frail body, which could not endure the strain of pioneer life.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and meet the path Aurora Tubbs had told her to follow. A truck came along the road, driven by Matthew Adams, and she asks him which way to go. They talked, and then he looked around, and then he went on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better.

Now Go On With The Story

CHAPTER XII.—Continued

"Dear useful Aunt Louise: A blizzard is raging and I can't see Pike's Peak from my tower, and have to hop up every five minutes to drop a log into the stove. I could write to the farm kitchen, but Aurora Tubbs would insist on talking, and I've simply got to get this down on paper. It came of my trying to find something to read this morning. All Cousin Columbine has is Scott and Dickens..."

"I love Dickens, and Scott too," Phil interrupted. "I can read those when I visit Cousin Columbine. Go on, Aunt Lou."

"Your sister does not share your admiration of the classics," observed his aunt. She says: "...and they look so dull (especially Scott), and the volumes are so heavy that I gave it up. I asked Aurora if there was a library here, and she said nobody in Pine Ridge had time to read, though the drug store does a thriving business in the sort of magazines that make you shudder and look schoolma'am, Aunt Louise! Anyway, that gave me the idea. When I talked with Cousin Columbine she said that there was no Aladdin in Pine Ridge to rub his wonderful

lamp, you know, and wish for a library; and while I was thinking what I'd do to this awful place if I were Aladdin, I got an inspiration!"

"I think she's pretty slow getting to it in the letter," grumbled Phil. "It happens to be in the next paragraph, sonny," said Aunt Louise, and went on reading: "It's this; and I'm rushing my letter so you'll have it before Christmas vacation. I want to start a library here, Aunt Lou. If I got the books, I'm sure I'd find a place to keep them. There's a schoolhouse here that isn't used now the children are carried to a county school in buses, which would be wonderful. I'd open the place two or three afternoons a week, and no matter what Aurora says, I'm sure the young people and old ones too would be glad to take out books if they had the chance."

"And here's where you come in: Wouldn't each girl at school donate a volume or two if you told them about the scheme? And haven't you and Mother got a lot you'd like to get rid of? No matter if they're shabby. Juanita Tubbs will help me cover them with paper. I'm sure the Adams will give some too; and if you have any friends with books to part with, just grab them for my Aladdin library. That's what I'll call it if I can get somebody to paint a sign without being paid for the work. The Aladdin Library! Won't that look swell over the door?"

"I shan't say a word to any one until I hear you from, but do write soon or I'm likely to explode. With the exception of the Adam boys and Mary Taylor, the postmaster's daughter, this population looks as if a library would be a step in the right direction."

Louise paused a moment, and then went on, a smile of amusement lighting her eyes: "Do not misunderstand, however. I have not become a missionary, or anything like that; but when you see people who have so little, it makes you think. Besides, I haven't got time to do. And Jack said Cousin Columbine wanted a slave! All the poor dear did want was to see some one belonging to her, before she died. And she's a long way from dying, if you ask me—the briskest (if there's no such word it doesn't matter) old lady I ever saw, and the most interesting."

"There's no time for more. The fire is almost out, and the wind is howling, and snow is drifting through the cracks in my lower windows. Cousin Columbine says I'll be dry as dust in a week, but I wonder. Love to every one at home, and do, do help."

Louise laid down the letter, and looked up.

"What are you grinning for, Phil Nelson?"

"I was thinking that Nancy'd make a real useful missionary," said the little boy. "I've got a lot of old books that she can have, just as well as not; and maybe some of the kids at school have got some too. Do you s'pose if I got a lot of books for the Pine Ridge library, that Cousin Columbine would pay my fare to Colorado?"

Dad smiled, and said: "Some one will have to pay expressage on those books! But well manage that if we go without our Christmas dinner. I'm proud of our girl, thinking this up all by herself; and we've got to help her put it through. It's fortunate we stored the books out here. Margaret. We'll spend to-morrow going over them."

"And I'll pay the expressage," promised his sister. "It won't be necessary to go hungry Christmas day."

Phil drew a deep breath of relief. "That's the stuff! It'll be a funny enough Christmas anyway, with Jack and Nancy gone. What are you thinking about, Mother? You look awful solemn and far-away."

"And I'll pay the expressage," promised his sister. "It won't be necessary to go hungry Christmas day."

Phil drew a deep breath of relief. "That's the stuff! It'll be a funny enough Christmas anyway, with Jack and Nancy gone. What are you thinking about, Mother? You look awful solemn and far-away."

His mother started, pulling herself together and smiling a bit wistfully. "Do you know," she told her family in surprise, "I've been so busy I only just remembered that—that Nancy was to have made her debut to-night!"

CHAPTER XIII.

"Two thousand miles away in Pine Ridge, Colorado, there had been no such forgetfulness. Nancy's first thought on waking was that this was to have been the day of her debut, perhaps because her eyes had fallen on a mammoth calendar (its "decoration" depicting a love-couple seated beside a purple lake), which was Aurora's donation to what the girl had christened her "chamber of horrors!"

So this was the day she had looked forward to so long! Nancy snuggled down under the patch-work quilt and gave herself to the luxury of introspection. What thrills she and Mother had had over their plans!

ITCHING TORTURE Stopped Instantly

D. D. D. Prescription Speeds Relief

Even the most stubborn itching of eczema, pimples, mosquito or other insect bites, rather than many other skin afflictions quickly yields to Dr. D. D. D. Prescription. Forty years' world-wide use. Penetrates the skin, soothing and healing the inflamed tissues. No fumes—no mess. Clear, greaseless and stainless. It dries up almost immediately. Try Dr. D. D. D. Prescription now. Stops the most intense itching instantly. A 35c trial bottle, at any drug store, is guaranteed to prove it—or money back. Dr. D. D. D. is made by the owners of ITALIAN BALM.

How exciting to indulge in all those evening gowns! And what would be happening to her now if that miserable stock market hadn't crashed, and Dad crashed with it?

Nancy glanced at her watch. It was seven o'clock—nine in Boston; and before long the flowers would have come pouring in: flowers from family friends, boy friends, girl friends too. She could almost see Aunt Judy's eyes shining with delight and pride as each fragrant tribute was brought in—dear Aunt Judy, who'd never done anything but look after other people! Mother would be a whirl of efficient excitement, enjoying every thrilling moment, and—

Oh, what was the use of these imaginings? Nancy asked herself. Even if Dad accumulated another fortune there would be no debt for her; and the chances were against his doing that—at his age. Fifty-six! Nancy wondered how it would seem to be fifty-six—shuddered—and then realized that Dad didn't seem old at all, and often acted younger than she did! This was a cheering thought, and the girl kicked off her quilt and ran to close the window.

At any rate, it was a glorious day, and all that snow had vanished, sinking into the ground and leaving everything quite dry again. Nancy opened her door, to be greeted by the aroma of frying bacon. After all, the day might not be so bad. She was going to the Springs with Mrs. Adams (whom she had not yet met), to purchase the sport hose as well as some ten cent "jokes" for Christmas; something to make laughter at the dinner table, though Cousin Columbine assured that there would be laughter at the Adam dinner table, jokes or no jokes.

Nancy was late to breakfast. Cousin Columbine pretended to be provoked, but the girl grinned at her. "I was too comfortable to move; and besides, I—well, I started day-dreaming."

"About what?" asked the old lady crisply.

Nancy consumed two bites of muffin, and then said: "Of all sad words of tongue or pen, 'Cousin Columbine,' the saddest are these—it might have been." I'll admit I was playing myself a little. This happens to be the day when Nancy Nelson expected to launch her bark on the—"social sea!"

She laughed, but it wasn't a natural laugh, and Cousin Columbine observed her gravely.

"Was giving up all that fuss and feathers a disappointment?"

"It was some jolt," said Nancy. "Could I have two eggs, please? And what time did Mrs. Adam say she'd come?"

"At nine o'clock. I wish you'd run down to the store before you leave, Nancy, and get some baking powder. Aurora's going to make a cake."

"Do you want chocolate or coconut?" questioned Aurora, poking her head in at the door. "If it's to be coconut, you'd better get another box; but consider!"

"Get the coconut anyway," broke in Miss Columbine, and motioned Aurora to go away. "I'm glad you're to have this trip to-day. You won't have time to be regretting what can't be helped. I want you to get a pretty scarf to give Eve Adams, something good, since we've got her for Christmas dinner. Eve never spends a penny on herself, and she likes nice things, and knows 'em too. That's all, except a book for John."

"You mean the old Adam?" asked Nancy, dimpling.

Cousin Columbine nodded.

"You'd better ask Eve what he'd like; and if you're through breakfast, go right down to the store now. Those Adam people are often ahead of time."

"You bring a couple o' pounds of powdered sugar," called Aurora as Nancy started off. "And" (as she reached the gate) "a cake o' chocolate!"

When Nancy returned laden with paper bags of various sizes, the Adam car was standing before the door; and as she laid her burdens on the kitchen table, Aurora said: "Well,

here you are! And Matthew Adam waiting six minutes. His mother couldn't go; and I hope to goodness that boy don't keep his mouth shut all the way. He's in the sitting room with Miss Columbine right now, but if you was to ask me, his brother Mark would have given you a more exciting time."

Nancy whirled about, laughing as she saw Matthew in the doorway. He said, apologetically: "I know, Aurora, but Mark couldn't be spared this morning. Don't kill yourself to hurry, Na-Nancy. I've got to put some water in the radiator. Just to take your time."

"Is Mrs. Adam sick?" questioned the girl as he went out.

"No, my dear," responded Cousin Columbine, "but Luke comes home to-morrow anyway, and Matthew had some errands he wished to do. Now run and get your things together, child; and don't hurry through your shopping for Matthew Adam or anybody else. If you're back by supper time it's soon enough."

Nancy was ready before Matt was; but Aurora stopped them, rushing from the kitchen as the engine roared.

"You get those woolen stockin's the first thing," she panted, "and then go right into a rest room and put 'em on. You see she does it, Matthew Adam."

"I'll do my best," Matt promised, his face crimson.

Corner In Earthworms

Speculators Are Holding Back Supplies From Melbourne Zoo

A new form of "racket" has been started owing to the dietary of the quaint duckbilled platypus which has its home in the Melbourne zoo.

Not least among the queer features of this animal is its huge appetite for earthworms, of which it now consumes more than 800 per day, considerably more than its own weight.

The authorities of the zoo are now confronted with the fact that speculators in earthworms are holding back their supplies of the commodity and are asking 15 cents per dozen instead of 12 previously charged.

It is a question of who will "turn" first, the worm speculators, or the curators of the zoo.

Used Distress Money

Austria Resorted To Many Substitutes When Coins Disappeared

During the war and after the collapse of the Austrian Monarchy, the backs of the commodity money were largely hoarded, many different kinds of paper notes, so-called "distress money," were issued by various towns, villages and provinces. In addition to primitive slips of paper, pieces of wood, parchment, leather, lacquer, and even porcelain were used as money. All these are on show at a remarkable exhibition at the Hagenbund Gallery at Vienna.

The exhibition shows that not only societies, but also innkeepers, newspapers, and political parties issued money tokens.

Why Name Was Used

The bug collecting hobby of an English aeroplane builder, J. de Havilland, has made the name moth known over the skyways of the world. As an entomologist, de Havilland specializes in the collection of moths—so the majority of his products are named after moths or some species of moth, such as Gypsy Moth, Puss Moth, Moth, Dragon, etc.

Garage But No Stable

Extensive plans for rebuilding the Royal Canadian Mounted Police headquarters at Winnipeg call for a 24-car garage. Nowhere in the proposed changes, approved by Ottawa, was there provision for stabling horses.

Sales of Diesel engines in Germany are increasing.

Paradise For Snakes

Six Species May Be Seen In One English District

If one wants to see snakes, he is advised to go to the city-mining district north of Corfe Castle, in Dorsetshire. If there is a snakes' paradise in Britain, this is the place. There are six species of British reptiles, and representatives of all of them, including the rare smooth snake and sand lizard may be seen here.

The other four species are the adder, the grass snake, the slow worm, and the common lizard. The adder is the only one of these reptiles that is poisonous and its bite is rarely fatal, though, naturally, medical attention should be obtained as quickly as possible if one is bitten. But it is not often that anyone is bitten, and this snake has been described as "dangerous only to toy dogs, stung babies, and invalids."

Collections Show Increase

Figures For Federal Income Taxes Higher This Year

Canadians are dipping into their pockets to pay more and more federal income taxes. It was shown in figures released by the department of national revenue. In the 1934 tax-tation, \$58,407,904 was collected in the first four months of the fiscal year, an increase of \$15,774,923 over 1934.

Only two districts, Quebec and Regina, showed decreases this year. Quebec a decrease of \$139,745 and Regina, \$1,301.

Editors Welcomed

Close to 200 editors and publishers attended the sixteenth annual convention of the Canadian Weekly Newspaper Association in Toronto. Delegates from all parts of Canada and Newfoundland, representing more than 100 weekly newspapers, were welcomed by Premier Mitchell F. Hepburn and Mayor James Simpson.

"John" is the most common Christian name among American vice-presidents.

There are approximately 67,000 tenement houses with 2,000,000 tenants, in New York City.

Little Helps For This Week

"Ye are all the children of light, and the children of the day." These salutations 5:5.

Serene will be our days, and bright. And happy will our nature be, When love is our unerring light, And joy its own security.

—Wordsworth.

Nothing can produce so great a serenity of life as a mind free from guilt, and kept untainted not only from actions but from purposes that are wicked. By this means the soul will not only be unpolluted, but not disturbed; the fountain will run clear and unsullied, and the streams that flow from it will be just and honest deeds, a briar energy of spirit which makes a man an enthusiast in his joy. For as shrubs that are cut down with the morning dew on them do for a time retain the fragrance of their fragrance, so the good actions of a wise man perfume his mind and leave a rich rent behind them. So that joy, as it were, is watered with these essences and owes its flourishing to them.

Place Was Transformed

Overseas Visitors Unaware They Were Received In Historic Room

Many of the guests at the Government garden party to overseas visitors at No. 10 Downing Street were quite unaware that when they were received by Mrs. Baldwin and Miss MacDonald it was in the Cabinet Room, the most famous in the British Empire, if not in the world, had been cleared of its usual furnishings and in particular of the big table at which so many fateful decisions have been taken. So unlike a meeting room it looked that one well-known overseas guest, as he left it, asked if it would be possible for him to have a look at the Cabinet Room. "But you have just come out of it," he was told. "Then let me go back and have a good look round it," he replied, and back he went.

The right arm of a man or woman is usually longer than the left.

There is an open air bath for the blind in Berlin.

THE CHRISTMAS TURKEY

In view of the fact that the summer and early autumn months is the time when plans for raising and fattening of turkeys for the Christmas market have to be made the issue of the new series bulletin on The Care and Management of Turkeys, published by the Dominion Department of Agriculture, Ottawa, comes at an opportune moment. Turkey breeding has developed during the past few years, and success has been attained where adequate care has been bestowed on the birds. As in other industries, attention to detail is necessary to success. The selection of healthy, well-developed breeders, the management of the breeding stock, the proper feeding and housing of the turkeys, the provision of free range for growing birds, and requisite sanitation are well recognized essentials. In order to keep the turkey flock free from disease, the greatest care should be exercised in the feeding of the adult birds which should never be fed from the bare ground, but from scrupulously clean dishes or troughs, and too much

caution cannot be observed in new golden spider beetle were captured in a sweeping drug store before any damage had been done. Silverfish have played havoc with wallpaper around Hamilton, Ont., and chicken mites have invaded a home in New Brunswick. In the same province, carpet beetles made a great outward show recently by indulging in serrated flights, but real damage as yet in the homes has been slight. Saw-toothed grain beetles, evidently possessed of an academic urge, made a massed attack on oats stored at Kemplville Agricultural School, Ont. From several districts in the various provinces come reports of invasions of homes by cockroaches from municipal dumps. Although the illustrated publication on household insects has been out of print for some time, full information can be obtained from the Dominion Department of Agriculture Ottawa, on how to combat these household pests, separate mimeographed instructions having been prepared on cockroaches, clothes moths, bedbugs, fleas, lice and other insects.

COMBATING HOUSEHOLD PESTS

Since the opening of Spring the Entomological Branch of the Dominion Department of Agriculture has been receiving from all parts of the Dominion the usual heavy mail containing inquiries regarding the common species of household insects, such as cockroaches, ants, silverfish, clothes moths, carpet beetles, fleas and other pests which have no wings but get there just the same. Ants have been plaguing householders in the different provinces and overrunning gardens in Saskatchewan, where specimens of the

Field Day Junior Wheat Club

The Youngstown Junior Wheat Club held their Field Day at the home of the President—John Allen Friday, August 2nd. Most of the boys were present also a number of parents and some visitors who are interested in young peoples work. The Club met in time for lunch, after which Mr Acton, of Dept. of Agriculture was the speaker and gave a very interesting address on grading of wheat. The new Act on Garnet Wheat, which has just been put into operation and the selling of wheat. The varieties which the Club at the normal cost is a pure variety and most suitable to the district where they are grown. Two varieties are being supplied to the club are Marquis and Reward, it being about ten days earlier than marquis and is a cross between marquis and Prelinde. Samples of wheat were then shown of marquis, reward, red bolts, bearded wheat, reliance, reneuf durham, ceres, caracould, dawson, golden chaffie, scollard shelter or spels, polish whsat. club and creston wheat grass & canus. The canus wheat being particularly interesting as it is expected that it will sub plant marquis in a few years.

Many questions were asked concerning the lodging of grain and the threshing also the straw for feeding purposes. The explanation of rust then followed, also plant breeding stations and how wheat is raised, tested, milled and flour baked. Samples of barley grown in Alberta.

A short discussion on Grass Hoppers and how to shallow cultivate after September 15th, to destroy the eggs.

Soil drifting part of the Act was read & Strip farming in the Lethbridge district and condition of that district.

Mr. Stewart then spoke for the wheat pool who also helped to sponsor the Club, also benefit of the boys' wheat Club and what a worth while work it is in keeping the wheat in your own particular district more pure. Educating the people to the wheat most suitable all over the province.

This is the 6th year it has done this work. There are 58 clubs with a membership of 817 boys. The highest score last year was 91.3 and lowest 49. The Youngstown Club's striding 70.1.

The Pool gives two prizes for the plot of wheat 1st. \$3.00, 2nd \$2.00. They send out field men every summer.

The achievements of some of the boys who have been Club members are worthy of mention. John Robertson, of Amrose, and Allsopp, of Wenley.

After thanking the speakers, the folks had lunch, departed for home after having spent a very profitable afternoon.

Mr. and Mrs. C. W. Rideout, Audrey, Eldon and Donna Mae, left Sunday for Comrey, Alberta, where they will visit with Mrs. Rideout's sister and brother in law, Mr. and Mrs. O. Nelson.

D. E. Bell was a Hanna business visitor Tuesday.

HOME CANNED MEATS

The home preservation of poultry, fresh meats, fish and soups is one of the high arts of the efficient housewife who is aware that these commodities may be canned as successfully as fruits and vegetables. Besides giving a supply of fresh meat for emergency occasions, the canning of some of the meat butchered on the farm is a right step in the way of economy. Beef might otherwise be used more freely than necessary at the time of killing can be saved for use in seasons when fresh meat is difficult to obtain. In all successful canning operations, there are many points to remember, but, with the latest bulletin of the Dominion Department of Agriculture on the subject, much unnecessary anxiety has been avoided. This publication is named "Home preservation of Meats, Poultry, Fish and Soups" and contains full information on what to do in canning fresh meat, poultry, corned beef, fish, chicken stock soup, chicken with rice, vegetable soup, chicken farm sausage and head cheese, and in curing meat by the brine cure, by the dry salt cure, and by smoking.

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter. The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in the Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two. All letters addressed to the editor for insertion in The Advance, must be signed to the bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The Weather Bulletin

Week of Aug. 19 to 25, 1935

Mon, Aug. 19 to 25, 1935—Few light rains about southeastern sections of central provinces, but in general weather turns clearer and warmer, except short cool spells about the east.

Tues, Aug. 20—The unsettled, rainy conditions drift to great lakes regions and the southeast, while most of the west remains clearing and warmer; in east somewhat cooler.

Wed, Aug. 21—Showery and scattering rains about south central regions, but clearing in far west and northwest, nearly everywhere warmer.

Thurs, Aug. 22—In most sections clearing weather, except slightly unsettled about southeast, turns clearer and cooler in west and northwest.

Fri, Aug. 23—Most of Pacific slopes regions and northwest central provinces cooler and clearer; cloudy, unsettled about the great lakes and to east.

Sat, Aug. 24—About the northwest and west clear and slightly warmer; cool and clear, except some clouds and unsettled in southeast sections of the central provinces.

Sun, Aug. 25—Clear and cool weather in all the west and on the Pacific slope; east also clearing, but temperatures rising.

Week of Aug. 19 to 25, 1935, in central provinces begins with cool weather but turning warmer, although for the week no great change in temperatures is to be expected. However, a sudden cool spell should come on just at last of week in the northwest, where there is some danger of the first autumn frosts on the plateau sections, but not extending far south or southeast. First of week showery rains that soon become scattering, drift on to the southeast and last few days nearly everywhere clearing. Most rain about the southwest, less northwest.

In this country the summer temperatures begin an appreciable decline, just after the middle of August, and from then on, while there will be a few hot days in some sections even as late as the 28th this year, at the same time some very cool spells seem likely to occur around the last of the month, especially in northwestern sections, and near the 28th one of these sudden cool spells is to be expected. In the central river basins frosts rarely occur in August but they sometimes come on in last days just after passing a center of low pressure and rain disturbance across the Alberta prairies. That is, as a rule the early frosts come on a day or two after a rain storm, and unless there is some rain on the prairies about this time frost is not likely to occur before the end of the month.

Temperature.	Warm	Mild	Cold
Mon	19		
Tues	20		
Wed	21		
Thurs	22		
Fri	23		
Sat	24		
Sun	25		

This is for the northwest regions; maxima and minima occur 1 day later about central regions; 2 days later near the great lakes and 3 days later on Atlantic coast.

BLACK RUST KILLS CROPS

PARKLAND — (Special) — Black rust is in evidence in this district. A ninety-acre stubbled field of wheat on the farm of Arndt Berger is so badly affected that the grain is a total loss. This is the first report of rust in this district.

Above layout shows a good cross-section of what is being done these fine summer days at the Algonquin Hotel, St. Andrew-by-the-Sea, New Brunswick. Right, Lady Stora-Ponsonby, daughter of His Excellencies the Governor-General and Lady Beasbrough, at the conclusion of a drive from a tee at the well-known 18-hole championship golf course of the hotel. Centre shows that part of Katy's Cove dedicated to swimming,

with youngsters and grown-ups alike in the sparkling waters or about to enter them. Inset illustrates another sport—sailing—with Miss Margaret Redmond, daughter of Mr. R. M. and the Honorable Mrs. R. M. Redmond, of Montreal, sailing with her father and Captain Wren, off St. Andrews. Left is Miss Eugene Auerbach, small daughter of Mr. and Mrs. J. A. Auerbach, of New York, all set with spade and bucket on the sands of Katy's Cove.

The Algonquin Hotel represents just about the acme of summer days for kiddies and grown-ups, too. Sea bathing in the warm waters of Katy's Cove and sun bathing on the shining sands are two of the most healthful and entertaining occupations of those who visit this popular and smart resort to which The Excellencies the Governor-General and Lady Beasbrough have given their patronage of late seasons.
